

Oracle Software License and Maintenance Strategy

Maximize Your Investment in Oracle Software

Oracle is the leader in helping companies gain business value from their data. The Forsythe team is uniquely positioned to help you maximize your investment in Oracle by improving contractual and financial management of current Oracle assets as well as advise on future investments in Oracle technology.

Forsythe works with you to:

- Decrease costs while increasing flexibility by evaluating contracts, policies and deployment
- Mitigate compliance risk by applying best practices to Oracle asset management

To achieve these benefits we assess what licenses you own, what products are deployed and how to plan for future investments, all while improving software asset management practices.

Assess License Ownership

The first step in effective Oracle license and maintenance strategy is to assess license ownership. Our comprehensive understanding of Oracle contracts and policies will help you assess what licenses you own, including options for annual maintenance savings.

Assess What is Deployed

The second step in effective Oracle license and maintenance strategy is to assess what products and options are deployed. Our expertise in distribution strategy, hardware configuration and license utilization, will help you right-size your Oracle licensing as well as reduce the risk of non-compliance and avoid unforeseen true-up costs.

Get the Forsythe Advantage.

For more than 35 years, Forsythe has delivered forward-thinking advice, technology, and operation-enhancing solutions. As an independent advisor, Forsythe can help you address every aspect of your infrastructure, including how new solutions may affect the bigger picture. Working with every major provider, Forsythe acts as your single point of contact for managing the cost, effectiveness, and risk related to your information systems.

Let Forsythe Help.

Business objectives—and business issues—don't exist in a vacuum. Forsythe identifies and addresses IT interdependencies to deliver solutions that work across your enterprise. Call us today.

At a Glance:

- Reduce annual maintenance fees
- Mitigate software compliance exposure
- Negotiate favorable pricing and terms
- Align technology with business objectives

Determine What You Need

Assessing licensing and deployment will help you plan for future investments in Oracle. Forsythe technical experts average 20 years of database experience to help you apply the right technology to meet your business requirements. Forsythe is certified to resell Oracle technology or can provide expertise to help you negotiate directly with Oracle.

Proactively Manage Oracle Assets

Proactive asset management is as important as creating a cost-effective and value-add Oracle infrastructure. Forsythe remains engaged to provide software asset management oversight and to help enable Oracle technology to meet your specific business goals.
