RTO Validation

At a Glance:

- Be prepared for any possibility
- Measure the effectiveness of your investment
- Ensure third-party objectivity
- Identify issues and ways to achieve recovery time objectives
- Evaluate new processes, staff additions, and changes as they occur

Meeting Your Recovery Time Objectives

The aim of any disaster recovery plan is to enable your organization to meet its stated recovery time objective (RTO), so you can resume business functions regardless of the scale of the disruption. Unlike many investments, disaster recovery initiatives can't be measured by traditional ROI. Instead, recovery return on investment is calculated by ensuring that the solution you create is likely to meet your goals.

That's why many clients look to Forsythe. Our RTO Validation service gives you an independent assessment of your ability to meet your stated RTO. Based on the systematic review of relevant data points, our proprietary RTO Validation tool creates a graphic depiction of expected RTO timelines. Then the Forsythe team makes practical recommendations for improving your readiness.

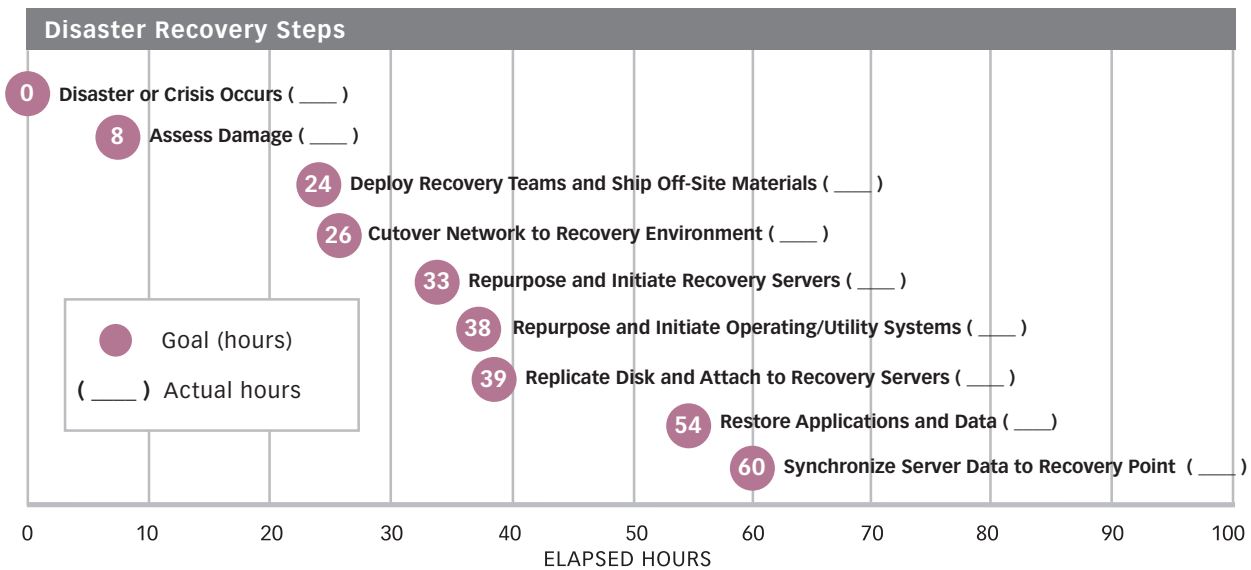

It's a clear, actionable method for ensuring that your RTO can be met if a crisis occurs.

Beyond the initial assessment, the Forsythe RTO Validation process can be applied to ongoing changes to your business operations and technology infrastructure. That way, you'll know that as your staffing, processes, or systems evolve, they won't adversely affect your organization's ability to recover as quickly as you expect.

Whether your recovery time objective is one week or one minute, you've made a significant investment in engineering a recovery plan. Forsythe's RTO Validation service can cost-efficiently measure and enhance that effort.

Measuring Goals Against Reality

Forsythe's RTO Validation tool and service allow us to help you identify disparities between your recovery time objectives and what is likely to actually occur. Then we can recommend ways to achieve your RTO goals.

Take a Closer Look

Work with Forsythe to take a close look at your disaster recovery program and ways to meet your recovery time objectives. We ensure an impartial, infrastructure-wide approach to assessing and enhancing your processes cost effectively.

Get the Forsythe Advantage.

For more than 35 years, Forsythe has delivered forward-thinking advice, technology, and operation-enhancing solutions. As an independent advisor, Forsythe can help you address every aspect of your infrastructure, including how new solutions may affect the bigger picture. Working with every major provider, Forsythe acts as your single point of contact for managing the cost, effectiveness, and risk related to your information systems.
