

Security Training & Education

RSA Security Training

About Forsythe Professional Training Services:

Forsythe provides the superior professional training organizations need to meet the ever-changing demands of the IT industry. Our courses are taught by certified systems engineers who draw from real-world experiences to create an optimal learning environment. Forsythe's proven track record demonstrates our commitment to quality and excellence.

RSA Security Training and Certification

Forsythe's RSA security training programs provide the hands-on learning and skills needed to support your enterprise security systems. Our two-day courses, hosted by Forsythe authorized training experts, allow your team to achieve or maintain the certifications they need.

RSA SecurID Administration

This two-day course provides an overview of the administrative responsibilities associated with RSA SecurID® products. The working principles behind RSA Authentication Manager software and RSA SecurID hardware and software tokens are discussed, including product architecture, time synchronization, integration into a Microsoft Windows domain environment, and use of the RSA SecurID Quick Admin feature. Extensive hands-on labs reinforce the administrative tasks involved in managing user populations and token assignment.

Topics include:

- RSA Fundamentals
- Web-Based Applications
- User Administration
- Structure
- Auditing, Reports and Troubleshooting
- RSA SecurID Software Authenticators

RSA SecurID Installation and Configuration

This two-day course offers hands-on training on the installation and configuration of RSA Authentication Manager software, RSA Authentication Agent hosts, and other RSA SecurID® system components. The subject matter in this course prepares students with the classroom component recommended for the RSA SecurID Certified Systems Engineer certification.

Topics include:

- Building a Security Solution
- RSA Authentication Agent Configurations
- RSA Authentication Manager Installation
- RSA SecurID Web Express
- RADIUS Interface
- Remote and Web Administration
- Server Consolidation
- Managing RSA Authentication Manager Replica Servers

Authorized Training Programs

Forsythe is an authorized training center for Check Point, Citrix, RSA and Nokia, and a training provider for Cisco, Microsoft, Symantec and VMWare. Forsythe also offers official (ISC)² CISSP certification training using (ISC)² certified instructors. Contact Forsythe's training department for a full list of additional offerings.

Mission Statement

The mission of our training centers is to provide you with superior technical and professional training that will help you achieve your business goals and objectives while maximizing the return on your IT investments.
