Security Product Training & Certification Course Listing

Check Point

Managing NGX R65 on Nokia IP Security Platform 5 days

Intense Boot Camp combines Nokia Foundation, Check Point NGX I and NGX II into 5 days. This class covers all the essential skills and information students need to know about implementing Check Point VPN-1/FireWall-1 NGX R65 on Nokia IP Security Platforms with Nokia IPSO v4.2. This is a great class with extreme hands-on and troubleshooting scenarios. Preparation for Check Point Certified Security Administrator (CCSA), Check Point Certified Security Expert (CCSE), and Nokia (NSA) certifications

Check Point Security Administration NGX I R65 2 days

This course provides an understanding of basic concepts and skills necessary to configure VPN-1. During this course, students will configure a Security Policy, and learn about managing and monitoring a secure network. Preparation for Check Point Certified Security Administrator (CCSA) NGX R65 - exam #156-215.65

Check Point Security Administration NGX II R65 2 days

This course provides an understanding of upgrading and advanced configuration of VPN-1 (NGX R65), installing and managing VPN-1 (on both internal and external networks), gaining the maximum security from Security Gateways, and resolving Gateway performance issues. Preparation for Check Point Certified Security Expert (CCSE) NGX R65 - exam #156-315.65

Check Point Security Administration NGX III R65 3 days

This course offers comprehensive training to enhance enterprise knowledge of VPN-1 NGX troubleshooting, network planning, and route-based VPN. For students who have completed NGX II and need VPN-1 troubleshooting skills, this class provides hands-on experience with Firewall-1 debug mode, VPN-1, and IKE debug modes to identify issues in each of these features, lab experience with route-based VPN and OSPF routing over VPN tunnels. Students work with fw monitor commands to capture packets as they pass through the Check Point Inspect Engine, and use the Check Point Infoview, and IKEView troubleshooting utilities. Preparation for Check Point Certified (CCSE) Plus NGX R65 - exam #156-515.65

Check Point Accelerated CCSE NGX R65 2 days

This accelerated course is an in-depth class designed to give you the critical knowledge and hands-on experience that you need to implement the NGX R65 platform. The purpose of this course is to assist the participants in upgrading their current Check Point Security Expert (CCSE) certificate to CCSE - R65 - exam #156-915.65

Check Point Endpoint Security Full Disk Encryption (Pointsec PC) 2 days

This course teaches students how to configure and manage a Pointsec PC protected device using the Pointsec PC Management Console. You will learn the details of hard-disk encryption, and how best to deploy Pointsec PC in your organization. Preparation for Check Point Certified Specialist – Pointsec (CPCS) - exam #156-706.63

Citrix

Citrix Password Manager (PS 4.5: Administration) 2 days

Intro to Citrix Password Manager 4.5: Deploy, manage, install, administer and support. Instructor-led discussion and hands-on labs and exercises.

Citrix XenApp (PS 4.5: Administration) 5 days

Deploying and administering Citrix XenApp (Presentation Server 4.5) and its components, including Load Manager, Installation Manager, Web Interface, Application Streaming and Secure Gateway. Learners will receive hands-on training for installing Citrix XenApp (Presentation Server) and Clients for using the various administrative consoles to configure published resources, policies, individual server and server farm settings, load evaluators, isolation environments, printers, and streaming applications.

Citrix XenApp (PS 4.5: Support) 3 days

Monitoring, maintaining and troubleshooting network environments running XenApp (Citrix® Presentation Server™ 4.5) software. Learners are introduced to the tools used to monitor the Presentation Server farm, record farm activity and general reports. In addition, learners take away the skills needed to maintain data and server integrity and to scale, optimize and troubleshoot the XenApp (Presentation Server) farm.

Nokia

Nokia Certified Security Boot Camp 5 days

This intense class compresses six days of Nokia training into a five day week. Courses include Nokia Foundation, High Availability, Connectivity and Network Optimization. Forsythe's Nokia Boot Camp is an immersion into administering Nokia security appliances, running IPSO 4.2 (or higher) and Check Point's NGX R65. Our focus is to get you the skills needed to successfully install, configure, and manage these sophisticated products. In addition we help prepare you for the challenging Nokia Security Professional certification exam. This class thoroughly covers diagnosis of Nokia IPSO and Check Point FireWall-1, as well as network and data loss problems.

Websense

Websense Certified Engineer – Web Security 2 days

You will learn how to install, configure, administer and support Websense Web Security Suite software. Through instruction, iLabs (instructor led demos and lab exercises) and hands-on lab practice exercises, you will gain familiarity with the requirements and recommendations of Websense product deployment, installation and configuration, Websense product and component functionality (remote filtering, delegated and remote administration) and troubleshooting via internal and 3rd party diagnostic processes. Preparation for Websense Certified Engineer – Web Security Professional - exam WCEWS-201
