

# Forsythe Security Training and Education Overview

At Forsythe, we go beyond our security advisory and integration services to provide you with comprehensive corporate security training and education—an integral part of your security program. We'll work with you to develop an education strategy and curriculum tailored to your needs.

From corporate-wide awareness programs to professional certification preparation to product training courses, we can provide the right level of security education for your employees. Forsythe's educational offerings can be tailored to your organization. They can be held at our Authorized Training Centers or onsite at your organization, and many courses are available online.

Corporate-Wide Security Education	Professional Certification Education Authorized (ISC) <sup>2</sup> ® Education Affiliate	Security Product Training & Certification Authorized Training Center and Training Provider
<p><b>Information Security Policy Awareness</b>  <b>Regulatory Compliance Awareness</b>  <b>General Security Awareness</b></p> <p>Security awareness is essential in order for security policies and practices to take hold, and for members of your organization to understand how to integrate security into their daily work habits and responsibilities. ## Security Product Training & Certification Course Listing

### Check Point

#### **Check Point Security Administration NGX I R65 3 days**

This three-day course provides an understanding of basic concepts and skills necessary to configure VPN-1. During this course, you will configure a Security Policy, and learn about managing and monitoring a secure network. Prepare for Check Point Certified Security Administrator (CCSA) NGX R65 exam #156-215.65

#### **Check Point Security Administration NGX II R65 2 days**

This two-day course provides an understanding of upgrading and advanced configuration of VPN-1 (NGX R65), installing and managing VPN-1 (on both internal and external networks), gaining the maximum security from Security Gateways, and resolving Gateway performance issues. Prepare for Check Point Certified Security Expert (CCSE) NGX R65 exam #156-315.65

#### **Endpoint Security with Pointsec 2 days**

This two-day course teaches students how to identify inherent risks of data storage on mobile computing devices, and how to identify the Pointsec endpoint-security product that alleviates specific risks. Prepare for Check Point Certified Specialist - Pointsec (CPCS) exam #156-706

### Citrix

#### **Citrix Presentation Server 4.5: Administration 5 days**

Deploying and administering Citrix Presentation Server 4.5 and components including Load Manager, Installation Manager, Web Interface, Application Streaming and Secure Gateway. Installing Citrix Presentation Server and Presentation Server Clients; using administrative consoles to configure published resources, policies, individual server and server farm settings, load evaluators, isolation environments, printers, and streaming applications.

#### **Citrix Presentation Server 4.0: Support 3 days**

Monitoring, maintaining, troubleshooting networks that run Citrix® Presentation Server™ 4.0. Intro to Resource Manager and other tools to monitor Presentation Server farm, record historical data and create reports. Maintaining data and server integrity; scaling, optimizing, troubleshooting Presentation Server farm.

#### **Citrix Password Manager 4.5: Administration 2 days**

Intro to Citrix Password Manager 4.5: Deploy, manage, install, administer and support. Instructor-led discussion and hands-on labs and exercises.

### Nokia Security Administration (NSA)

#### **NSA Foundation 2 days**

Intro to Nokia IP Security Platform: Deploy, manage and maintain Nokia family of IP security products. Lab exercises for effective management of Nokia IP Security Platforms.

#### **NSA High Availability 1 day**

Theory and practice of high availability in a complete Check Point-on-IPSO security system. Hands-on lab implementation of a security system with minimal (known and quantified) single points of failure.

#### **NSA Connectivity 1 day**

Theory and practice of routing in a complete Check Point-on-IPSO Security system. Hands-on lab implementation of an entirely dynamically routed network with routing security, firewall security, and routing over VPN.

#### **Training Locations**

**United States:**  
Dallas, TX (Plano)  
Atlanta, GA  
Charlotte, NC  
Chicago, IL (Skokie)  
**Canada:**  
Winnipeg, MB

#### **On-Site and Customized Training and Education**

Classes can be held on-site at your organization and can be customized to fit your specific training needs.

#### **Training Guarantee**

We take great pride in the quality of the training we provide. If you are not satisfied with your training for any reason, you may retake the same training course within a six-month period at no cost and with no questions asked.
